

Shingles or Herpes Zoster Virus: 78 Y.O. lady

Diagnosed case of shingles.
Appearing 1 week prior to initial application of Tamanu oil (Monday 2/11/09).
Skin was tight, could not stretch the neck, extremely painful area to rub or touch.
The wound was weeping, inflamed and blistery.
Tamanu oil was then applied 3 times per day.

Within first application 30 mins later, less pain, eased up the neck and skin tightness.

Skin area could be touched without any pain from saturday 7/11/09.
Photo taken on sunday 8/11/09 (only six days later).
The wound has all sealed up and only the new pink skin is showing.
